EU-China cooperation on Climate Change

Facts we have to know

Largest emitters of greenhouse gases

Source from: World Resources Institute

How do the emitters react to the issue of climate change?

At the EU-China Summit 2017, EU and Chinese leaders reaffirmed their commitment to implementing the 2015 Paris Agreement on climate change and, as major energy consumers and importers, highlighted the importance of fostering cooperation in their energy policies.

China makes big strides on climate change

China committed to reaching peak emissions by 2030.

United States reaction under Donald Trump's presidency

On June 1, 2017, United States President Donald Trump announced that the U.S. would cease all participation in the 2015 Paris Agreement on climate change mitigation. Trump stated that "The Paris accord will undermine (the U.S.) economy," and "puts (the U.S.) at a permanent disadvantage."

Can EU-China cooperation save the Paris agreement?

"Bridging the gap between sustainable development commitments and mostly carbon and sustainability-blind trade policies would be a real game-changer."

Céline Charveriat-Executive Director of the Institute for European Environmental Policy (IEEP)
